

Advance bulletin  
1971 CENSUS OF CANADABulletin préliminaire  
RECENSEMENT DU CANADA 1971

## POPULATION BY AGE GROUPS

Final population counts of the 1971 Census are presented in this report distributed by specified age groups. Figures are shown for Canada, provinces, census divisions, incorporated cities, towns and villages of 10,000 and over, as well as for census metropolitan areas.

More detailed classifications by five-year age groups and single years of age by sex will be issued at later dates as part of the regular volume series of final reports of the 1971 Census. The purpose of this advance report is to make available summary totals at an earlier date.

Age classifications in the census are based on the number of completed years of age at last birthday prior to June 1, 1971. Respondents were asked to report their month and year of birth, which was converted by mechanical means to age at last birthday.

The 1971 Census figures in this report have been subjected to the confidentiality procedure introduced in the 1971 Census to prevent the possibility of associating small figures with any identifiable individual. Briefly, it involves the random rounding of all last or unit digits. Since totals are independently rounded, they do not necessarily equal the sum of rounded figures in distributions. Also there may be slight differences between comparable figures in this report and those in other census bulletins. This technique will be described in the reports of the 1971 Census volume series.

Each bulletin of the 1971 Census volume series will include measures of reliability in the form of estimates of the mean square error for sets of characteristics covered in that bulletin. The user interested in obtaining an indication of the reliability of these advance data should refer to the appropriate bulletin in the volume series.

## POPULATION PAR GROUPE D'ÂGE

Ce bulletin présente les chiffres définitifs de population, au recensement de 1971 du Canada, des provinces, des divisions de recensement, des cités, villes et villages constitués de 10,000 habitants et plus et des régions métropolitaines de recensement, selon certains groupes d'âge.

Des classements détaillés par groupe d'âge quinquennal et par année d'âge selon le sexe paraîtront ultérieurement dans le cadre de la série des volumes du recensement de 1971. L'objet de ce bulletin préliminaire est de communiquer les résultats sommaires le plus tôt possible.

Les classements par âge sont fondés sur le nombre d'années révolues au dernier anniversaire de naissance avant le 1<sup>er</sup> juin 1971. Les enquêtés devaient indiquer le mois et l'année de leur naissance; une simple opération mécanique a ensuite permis de fixer l'âge au dernier anniversaire.

La confidentialité des données présentées ici est assurée par la méthode utilisée au recensement de 1971 pour interdire la possibilité d'associer des chiffres de faible importance à une personne en particulier. En un mot, cette méthode consiste à arrondir au hasard tous les derniers chiffres, c'est-à-dire les chiffres représentant les unités. Ainsi, tous les chiffres ayant été arrondis individuellement, leur somme ne donne pas nécessairement les totaux indiqués. Il peut également y avoir de légères différences entre des chiffres comparables de ce bulletin et ceux d'autres bulletins du recensement. Une description de cette technique figurera dans les bulletins de la série des volumes du recensement de 1971.

Chaque bulletin de la série des volumes du recensement de 1971 renfermera des mesures de fiabilité sous forme d'estimations de l'erreur quadratique moyenne relativement aux groupes de caractéristiques observées. L'utilisateur désireux de connaître le degré de fiabilité de ces données préliminaires devra consulter le bulletin approprié de la série des volumes.
